**Subject:** Microsoft Settlement

Hello

As ancien programmer and Chief system administrator, I am currently against the proposed settlement because:

- 1) <http://www.kegel.com/remedy/remedy2.html>, I share most of there complain
- 2) it will not break the current Microsoft monopoly
- 3) it will not prevent Microsoft to extend its monopoly to other software as for example, www browser, office application or language.

Sincerely,

Un L'Unique
